

BALAJIGOWDA HS

Dallas, TX | (571) 277-3324 | balajigowdahs04@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Data Analyst skilled in SQL, Python, and Power BI, building interactive dashboards and semantic models that support strategic decisions. Experience developing ETL pipelines on large datasets and implementing data governance to ensure consistency, security, and actionable insights for cross-functional stakeholders.

Technical Skills

- **Programming & Data Tools:** SQL, Python, R, STATA, Microsoft Fabric
- **Data Analysis & Modeling:** Data Analysis, Forecasting, Segmentation, Statistical Analysis, Machine Learning
- **Visualization & Reporting:** Power BI, Tableau, Excel, Dashboard Development, DAX
- **Data Management:** ETL Pipelines, Data Validation, Data Modeling
- **Certifications:** Azure Data Scientist Associate, Google Analytics

Professional Experience

Tangensis | *Data Analyst*

Mar 2025 - Present

- Transformed fragmented marketing and sales data into structured datasets by building SQL and Python pipelines processing 20K+ monthly transactions, reducing manual reporting effort by 40%.
- Enabled faster decision-making by developing 4+ Power BI semantic models and dashboards with DAX measures, ensuring performant visuals that tracked key marketing and operational KPIs, reducing decision turnaround time by 35%.
- Identified high-value customer segments and behavioral patterns by analyzing 200K+ records using Python and SQL, improving targeting strategies and campaign effectiveness.
- Translated complex datasets into clear, actionable insights and recommendations, supporting cross-functional stakeholders in prioritizing business decisions.

The George Washington University | *Research Assistant*

Sep 2024 - Dec 2024

- Generated research insights by processing and analyzing 50K+ records stored in Parquet format using Python and SQL, enabling structured trend analysis across datasets.
- Identified key drivers influencing outcomes by building regression and forecasting models explaining 62% of variance.
- Improved research efficiency by automating data preparation workflows, reducing manual effort by 35% and enhancing reproducibility.

FI Consulting (Capstone) | *Data Analyst*

Jan 2024 - May 2024

- Analyzed 16M+ HMDA lending records stored in Delta Lake tables using SQL and Python to evaluate approval patterns, borrower characteristics, and potential disparities across segments.
- Conducted segmentation and scenario (“what-if”) analysis to assess how changes in key variables (income, loan type, geography) impacted approval outcomes and risk exposure.
- Built predictive models achieving 89% accuracy to estimate approval likelihood, translating model outputs into interpretable insights for decision-making.
- Developed dashboards and structured presentations summarizing findings, enabling stakeholders to understand trends, key drivers, and potential policy implications.

Fortune Spiritz Pvt. Ltd. | *Data Analyst*

May 2022 - Jul 2023

- Improved visibility into business performance by developing Power BI semantic models and dashboards tracking 10+ KPIs, enabling data-driven monitoring of revenue and demand trends.
- Consolidated data from 5+ sources using SQL and Python ETL workflows within a data lakehouse architecture, improving data consistency and enabling scalable reporting.
- Supported planning and inventory decisions by analyzing pricing and demand across 200+ SKUs, identifying actionable patterns.

Education

The George Washington University | *Master of Science, Business Analytics*

Washington, D.C. Aug 2023 - Jan 2025

Dr Ambedkar Institution of Technology | *Bachelor of Technology*

Bengaluru, India Jul 2018 - Aug 2022

Relevant Projects

Customer Segmentation & Behavior Insights

- Identified distinct customer segments by applying clustering techniques on transaction data using Python (Pandas, Scikit-learn) and SQL queries against our data lakehouse, enabling more targeted marketing strategies
- Analyzed purchasing behavior and segment characteristics to uncover high-value customer groups and key drivers of engagement.
- Developed Power BI semantic model and interactive dashboards, leveraging DAX measures to visualize segment insights and support data-driven decision-making for business stakeholders

Apple Maps Experience Intelligence

- Analyzed large-scale App Store and Reddit user feedback using NLP techniques in Python to identify recurring issues and user experience gaps.
- Applied sentiment analysis and feature extraction to quantify user pain points and prioritize areas for product improvement.
- Synthesized qualitative and quantitative insights into Power BI dashboards, ensuring data quality and documentation for structured interpretation of user behavior trends
